

ANNOUNCEMENT

PSORIASIS RESEARCH AWARD

The Department of Dermatology, Baylor University College of Medicine, Houston, Texas, announces that Dr. Med. Habil. Szakall, Hamburg, Germany, has been awarded the fourth annual Mr. and Mrs. J. N. Taub International Award for Research in Psoriasis. The one thousand dollar award was given for his many contributions in basic research and in psoriasis over the past ten years.

This annual award was established in 1957, by Carol and Henry J. N. Taub in honor of their grandparents, Mr. and Mrs. J. N. Taub. The establishment of this ten year program carried with it the hope that the award will be the instrumentality by which a cure may be developed to alleviate one of the problems of mankind.

The award is designated for the individual or group contributing the most outstanding investigative work in this field. Results of the research must have been presented before a dermatological medical society or published in one of the recognized medical journals. The name of any applicant for the award, together with supporting data, should be submitted for consideration by December 31 of the same year.

The recipient of the award is determined by a committee composed of Drs. M. R. Caro, University of Illinois; E. P. Cawley, University of Virginia; A. C. Curtis, University of Michigan; E. M. Farber, Stanford University; J. M. Knox, Baylor University; A. B. Lerner, Yale University; and C. T. Nelson, Columbia University.

If in the opinion of the committee a given calendar year fails to yield a deserving contribution, the award will not be given.

Address all communications to:

John M. Knox, M.D.
Associate Professor
Baylor University
College of Medicine
Houston 25, Texas
